Dear [Redacted]

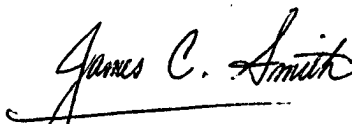

It was a pleasure working on the new headquarters building and I want to thank you for the opportunity to create the paintings. The architectural drama was very challenging to perceive and illustrate interpretations.

Enclosed are some samples of my other work on recent commissions. I would also like to do further work for the agency, if possible, not only in the architectural area but the interpretation of various subject matter, aerial views, retouching photography, space and upper atmosphere paintings, underwater paintings, etc. I am currently doing a lot of night and evening illustrations for various clients and feel competent in any of the aforementioned areas.

Could you please forward my letter and prints to the appropriate purchasing officers. Feel free to contact me if any questions arise.

Thank you.

Sincerely yours,

  
James C. Smith
